RATIO

You will find exceptional versatility with this functional and flexible shelving system.

This shelving system encapsulates the true meaning of flexibility. Its modular construction provides the highest degree of functionality and versatility and its style; and quality makes it suitable for both contemporary and classic library environments.

The Ratio shelving system offers two different visual and functional options: Ratio-B is without top shelf and the bottom shelf is placed 230 mm above the floor, creating an open, airy feel. The Ratio-S model is with top shelf, bottom shelf as well as a plinth, the bottom shelf being placed only 100 mm from the floor, taking full advantage of the height of the shelving system and is ideal for large volumes often used in scientific libraries. The article number for the bay is the same, the model depends on where you place the shelves on the actual bay.

The design of the shelving system, with 32 mm increments, allows for easy assembly and adjustment without the use of specific tools.

The Ratio Shelving System is available as single- or double-sided and can be fitted with steel or wooden shelves, as well as a wide variety of other functional components. The result – a customisable shelving systems that fits the requirements of your specific library.

DESIGN OPTIONS

STEEL COMPONENTS (see overview page 6)

Price Group 1: no surcharge.

Price Group 2: surcharge of 7%.

Price Group 3: other RAL/NCS colours with a starter fee of EUR 250 and with a surcharge of 15%. A higher surcharge for colours with "metallic" look or different surface textures must be expected.

See specific colour for steel gloss specification. Special requests outside specified gloss range are not covered by the above surcharges.

Chrome, electro galvanised and aluminium parts are not available in other colours.

Products such as e.g. wheels and accurides cannot be produced in other colours than described in the price list.

WOODEN COMPONENTS (see overview page 7)

MELAMINE COATED

Price Group A: no surcharge.

Price Group B: surcharge of 10%*

*If you wish to order shelf length of W1000 mm in group B, please contact Sales, as prices vary depending on quantity ordered.

VENEER

Price Group C: surcharge of 20%.

OTHER FINISHES

Most of the wooden components are available in other finishes, such as laminate (HPL), with a surcharge, please ask customer service.

Ratio shelving with functional end panels

TECHNICAL SPECIFICATIONS

GENERAL SPECIFICATIONS

DIMENSIONS

Dimensions of each component can be found under the individual products. All cited measurements are nominal sizes. The actual size of a module measuring 1000 mm is 995 mm etc.

MAXIMUM LOAD

Wooden and steel shelves are to be loaded with a maximum of 80 kg.

BAY CONSTRUCTION - STARTER AND ADD-ON BAY - SAME HEIGHT

A starter bay includes one right and one left end panel with holes on the inside of the panel. To add another bay, you must take off the right end panel, insert the add-on bay (with one intermediate panel with holes on both sides) and fix the right end panel to the add-on bay. See example below.

BAY CONSTRUCTION - STARTER AND ADD-ON BAY - VARIOUS HEIGHTS

When constructing a shelving system with various heights, you must take care when ordering starter and add-on bays. See example below.

BAYS WITH CASTORS

Only double-sided shelving with back frame support with a max. height of 1768 mm can be mounted on castors, and only double-sided shelving with cross brace/back panel with a max. height of 2056 mm can be mounted on castors. Castors are only to be mounted on a max. of 2 adjoining bays. Castors are available as soft/hard and with/without brakes. Max. load of 90 kg per castor.

SHELVES WITH SCREWS AND PINS

Wooden and steel shelves are delivered with either screws (for fixation) or pins (for insertion). Each bay must have at least 2 shelves (4 shelves for double-sided bays) - top and bottom - screwed into the panels for stability. The remaining shelves can be inserted via pins. See overview below for amount of shelves necessary for each bay height

H1096 mm - 2 shelves - top and bottom

H1512 mm and higher - 3 shelves - top, intermediate and bottom

ASSEMBLY

All wooden shelving units come knocked-down. No special fittings or tools are needed.

TECHNICAL SPECIFICATIONS

STEEL COMPONENTS

STEEL COMPONENTS

are powder coated with standard polyester based powders that secures high UV resistance. Powders comply with EN 45545 (fire protection - similar to DIN 4201). Thickness of the coating is 60-80 μ m.

The powder used includes:

- no triglycidylisocyanurate (TGIC)
- no heavy metal-containing pigments such as lead and cadmium
- no volatiles

Antibacterial equipping of surfaces upon request.

CROSS BRACES

are made of galvanized steel \varnothing 4 mm. When installed the cross brace has a total height of 1340 mm, the cross brace can therefore not be used for bays H1096 mm.

BACK FRAMES

are made of 30 x 15 x 2 mm rectangular steel tubes.

SHELVES

are made of 1 mm steel.

FRAMES FOR CASTORS

are made of 40 x 20 x 2 mm rectangular steel tubes and 40 x 5 mm flat steel.

TECHNICAL SPECIFICATIONS

WOODEN AND GLASS COMPONENTS

WOODEN COMPONENTS

are either melamine coated or have a environmental-friendly transparent lacquered veneer finish. Differences in colour underline the characteristics of veneer and cannot be avoided.

MELAMINE COATED AND VENEER END PANELS

are made of 25 mm E1 quality particle board. End panels are also available in 26 mm glued solid beech or oak upon request.

MELAMINE COATED AND VENEER INTERMEDIATE PANELS

are made of 25 mm E1 quality particle board.

MELAMINE COATED AND VENEER FUNCTIONAL END PANELS

are made of 25 mm E1 quality particle board.

MELAMINE COATED AND VENEER BACK PANELS

are made of 16 mm E1 quality particle board.

MELAMINE COATED AND VENEER SHELVES

500, 750 and 900 mm shelves are made of 25 mm E1 quality particle board.
1000 mm shelves are made of 25 mm blockboard (to prevent shelf from sagging).

MELAMINE COATED AND VENEER TOP COVER

are made of 25 mm E1 quality particle board.

MELAMINE COATED AND VENEER DOORS

are made of 19 mm E1 quality particle board.

GLASS COMPONENTS

GLASS DOORS

are made of 6 mm toughened glass (ESG).

RATIO SQUARE

The Ratio panel comes with a flat front end. The shelves are almost flush with the panels, the distance between the front edge of the panel and the front edge of the shelf is 7 mm. The holes are placed 37 mm from the edge of the panel.

Ratio panels are delivered as standard with 25 mm E-1 quality particle board with melamine coated/veneer finish.

HEIGHTS

Ratio Square is available in 3 heights; 1096/1101, 1512/1517 and 1768/1773 mm (with H95 mm castors /H100 mm plinth). The shelves are adjustable in 32 mm increments.

WIDTHS

The bays are available in 3 widths: 500, 750 and 900 mm. The total width of the unit depends on your choice of both shelf width and shelf depth.

DEPTHS

The panels are available in 2 depths: 250 and 300 mm. Actual width of single-sided 250 mm panel is 287 mm. Actual width of single-sided 300 mm panel is 337 mm.

287

337

RATIO SQUARE

CONFIGURATIONS WITHOUT SHELVES

A complete square shelving with end panels, back panel, top and bottom plate. There are 8 castors in total (4 inner castors without brakes, 4 outer castors with brake). See pages 43-70 for shelves and functions for Ratio Square.

RATIO SHELVING

The following pages will show basic configurations of the Ratio shelving system. The article numbers are made according to the following system:

Pos. 1	Pos. 2-3	Pos. 4	Pos. 5-6	Pos. 7	Pos. 8	Pos. 9	Pos. 10	Pos. 11
Company name	Shelving type	Business number	Bay type	Panel type	Connection element	Height mm	Module mm	Shelf depth mm
S	RT	B	11	1	1	G	W	M
Schulz	Ratio	B	11: SS starter 12: SS add-on 13: DS starter 14: DS add-on 16: DS starter with castors 17: DS add-on with castors	1: Melamine coated / veneer	1: Cross brace 2: Back panel 3: Back frame	G: 1096 C: 1512 A: 1768 D: 2056 E: 2248	R: 500 S: 750 U: 900 W: 1000	M: 250 N: 300

The Ratio shelving system offers two different visual and functional options:

RATIO-B

This system offers the open floor space often required for open-shelf libraries, as the bottom shelf is placed 230 mm above the floor and is without plinth. You still have the option adding a top shelf.

RATIO-S

This system offers the option of adding both top and bottom shelf, as well as a plinth, making a fully enclosed wooden shelving system. The bottom shelf is placed 100 mm above the floor.

RATIO SHELVING

The Ratio panel comes with a flat front end. The shelves are almost flush with the panels, the distance between the front edge of the panel and the front edge of the shelf is 7 mm. The holes are placed 37 mm from the edge of the panel.

Ratio panels are delivered as standard with 25 mm E-1 quality particle board with melamine coated/veneer finish but can also be delivered in solid 26 mm beech or oak upon request.

HEIGHTS

Ratio shelving system is available in 5 heights; 1096, 1512, 1768, 2056 and 2248 mm. Heights include adjustable feet (max. 15 mm) with leveling screws in steel threads. The shelves are adjustable in 32 mm increments. Depending on where the shelves are inserted, the following variations are possible:

RATIO-B

RATIO-S

DEPTHS

The panels are available in 2 depths: 250 and 300 mm.

Actual width of single-sided 250 mm panel is 287 mm
 Actual width of single-sided 300 mm panel is 337 mm
 Actual width of double-sided 250 mm panel is 540 mm
 Actual width of double-sided 300 mm panel is 640 mm

WIDTHS

The bays are available in 4 widths and as starter and add-on bays. A starter bay has two side panels and an add-on bay has one side panel.

PANEL OPTIONS

Ratio panels are delivered as standard with 25 mm E-1 quality particle board with melamine coated/veneer finish as either standard end panel or with functional end panel.

PANEL OPTIONS

You also have the option of having end panels delivered in solid 26 mm beech or oak or add an end panel in perforated steel.

RATIO SHELVING

SINGLE-SIDED - CROSS BRACE

The starter bay includes two end panels (with holes on the inside), cross brace and fittings. The add-on bay includes one intermediate panel (with holes on both sides), cross brace and fittings. Bay with cross brace is not available for H1096 mm due to height of cross brace. For shelves and functions, see from page 43.

FUNCTIONS

DISPLAY AND STORAGE - FOR SHELVES

Create storage space for magazines on horizontal shelves. Add a flap or box to existing shelves to present current edition as well as systemize and store previous editions of magazines.

Steel magazine flap

H340 mm (without shelf). Lacquered steel. Min. height between shelves must be 327 mm. To be screwed into panels. Effective lever mechanism keeps the open flap up. Easily retrofitted for single- and double-sided shelves. Recommended to use with back panels. Ratio bays H2248 mm can be equipped with max. 6 flaps. With space for storage of magazines piled horizontally 160 mm.
