Sky Wall

Design: Stefan Borselius

The Sky Wall modular system makes it possible to liven up spaces by simple means and radically change their look while dampening noise at the same time.

The extent to which you transform the space is determined by how you arrange the modules and which colour or colours you choose.

Materials and sustainability:

Sky is manufactured according to technical, environmental and production ethical requirements.

No emissions to air, water or soil take place at Abstracta's factory during the production of Sky.

All materials in Sky are recyclable, either as material or energy.

Sky meets the environmental requirements of "Möbelfakta".

All materials in Sky are recyclable, either as material or energy.

Worn out products are dismantled and transported to a recycling station.

Colours, Certificates, Digital Images & CAD files:

Measurements WxHxD (mm)

846 x 591 x 120 mm.

Absorption

Absorption $\alpha_w=0,90$

Class A according to ISO11654

N10=31 evaluated according to ISO20189

Tips from Abstracta! Unique visuals + functionality!

Arranging the modules in clusters creates undulating patterns evocative of cloud formations. Like clouds, the clusters set one's thoughts in motion.

Sky Wall is also fitted with magnets that attach to metal plates bolted to the wall.
